INTRODUCTION: THE BIOLOGY OF HIGH TENSION

Logic fails the exact moment chemistry takes over. Most people believe attraction is built through conversation. This is a fundamental misunderstanding of human biology. True attraction operates within the oldest, most primitive parts of the human brain: the limbic system.

This book is not about chasing. Chasing implies a lack of value. Instead, this guide teaches you how to establish a gravitational pull using the subtle, overlooked laws of human psychology.

CHAPTER 1: THE SILENT SIGNALS

- **The Two-Second Rule:** When your eyes meet theirs, hold the gaze for exactly two seconds longer than is socially comfortable with an entirely neutral expression. This extended window forces their brain to ask why you are observing them.
- **The Triangle Glance:** Shift your focus in a precise sequence: look at their left eye, drop smoothly down to their lips, then look back up to their right eye. This sequence triggers an involuntary biological response, heightening physical awareness.
- **Controlled Slow Motion:** Anxiety speeds up human behavior. High-value individuals move with deliberate, controlled pacing. Turn your head slowly, speak in lower registers, and embrace natural pauses.

CHAPTER 2: SUBCONSCIOUS MIRRORING

- **The Chameleon Effect:** Wait roughly 30 to 60 seconds, and then subtly adopt their posture. Never do it instantly. By delaying your reflection, their conscious mind misses the shift, but their subconscious registers comfort.
- **Vocal Pacing Synchronization:** Match their tempo and volume during the first

outside of them.

- **The Peak-End Rule:** Cut interactions short while the laughter is loud and the tension is high. Leave them with a psychological cliffhanger so their brain plays the interaction on a loop.
- **The Digital Blackout:** Keep your digital footprint minimal and high-quality. Force them to use their imagination to fill in the blanks of your day.

CHAPTER 4: TEXTUAL CHEMISTRY

- **Textual Equilibrium:** Never send double texts or messages longer than theirs. Speak in short, declarative, punchy sentences.
- **The Push-Pull Text:** Deliver a subtle compliment, immediately followed by a playful takeaway or disqualification. *Example: "You have a dangerous amount of great music taste. It's a shame we probably wouldn't get along at all."*
- **Breaking the Instant Reply Habit:** Vary your response times dynamically. Let messages sit for hours or overnight to break the illusion of constant availability.

CHAPTER 5: THE FINAL CHASE

- **Outcome Independence:** Enter interactions with the mindset of: "I am here to see if I enjoy their presence, not to convince them to enjoy mine." Desperation vanishes when you don't require an outcome.
- **The Abundance Mindset:** Build a life rich with personal disciplines and career goals. Approach others with an overflowing cup, offering an elevated experience rather than looking for validation.
- **The Unshakable Frame:** If someone pulls away, match their distance smoothly without anger. Your quiet refusal to break character under pressure is the

2. "I just saw something that reminded me of you, but I'm keeping the details a secret for now."
3. "Are you always this distracting, or am I just catching you on an off day?"
4. "I have a highly specific question for you, and your answer will change how I look at you."
5. "Stop being so interesting. I actually have work to finish today."
6. "You have a dangerous amount of chaotic energy, you know that?"
7. "I just had a highly entertaining thought about our last conversation."
8. "My phone just lit up, and for a split second, I actually hoped it was you."
9. "You owe me a coffee. I'm not telling you why yet, just write it down."
10. "I was just thinking about how much trouble you probably cause on a daily basis."

Phase 2: The Push-Pull Effect

11. "You are entirely too charming for your own good. It's almost a red flag."
12. "We would either be absolute best friends or complete enemies. No in-between."
13. "I like your energy. It's a shame we probably wouldn't get along at all."
14. "You have great taste in music. Too bad your taste in movies is tragic."
15. "You look incredibly elegant in your new photo. Don't let it go to your head though."
16. "I'd tell you a secret, but I'm not entirely convinced I can trust you with it yet."

22. "You're fun to talk to, but my laptop is screaming at me to finish this project. Talk later."
23. "I'm putting my phone on do-not-disturb for the night. Enjoy the peace and quiet."
24. "That's a conversation best saved for a real-life drink. I'm logging off for now."
25. "I have a flight to catch early tomorrow. Don't stay up late thinking about this."
26. "My battery is at 2%, so you'll have to survive without my witty commentary for a bit."
27. "I'm diving into a deep focus session. Be good."
28. "You've officially used up your text quota with me for the afternoon. Catch you later."
29. "I'm stepping away from the digital world for a few hours. Try to manage."
30. "And on that high note, I'm heading out. Have a great night."

Phase 4: Subconscious Directives

31. "I bet you have a completely different personality when you're caught off guard."
32. "You seem like the type of person who always gets exactly what they want."
33. "I have a feeling you're secretly a hopeless romantic, even if you pretend not to be."
34. "You look like someone who knows exactly how to read a room."
35. "I can already tell that arguing with you is an absolute nightmare."
36. "You definitely don't follow rules very well, do you?"

42. "I found a hidden jazz lounge downtown that fits your vibe perfectly. Let's go next week."
43. "My schedule is packed, but I can clear a window next Tuesday afternoon if you want to grab coffee."
44. "You've successfully intrigued me. Let's see if you're this interesting in person."
45. "I'm trying a new rooftop spot tomorrow evening. You should come keep me company."
46. "Let's trade stories over a glass of wine instead of typing them out with our thumbs."
47. "I'm planning a quick city escape this weekend. You have 5 minutes to convince me to invite you."
48. "Let's do a spontaneous coffee run right now. You have 20 minutes to get ready."
49. "I only hang out with people who can match my dark humor. Let's test yours on Friday."
50. "Let's make a deal: we meet for one quick drink. If we hate each other, we can just pretend it never happened."

how do I automate the whole process

11:02 pm

To automate this entire ecosystem, you need to connect your content creation, social media scheduling, messaging, and digital product sales into a hands-off, self-sustaining loop.

Here is the exact automation stack and workflow blueprint to make the entire channel run on autopilot.

🛠️ The Automation Tech Stack

To achieve 100% automation, you will use these four core tools:

1. **Make.com (or Zapier):** The central brain that moves data between Google Drive, your AI video generators, and your scheduler.
2. **Buffer, Metricool, or Later:** Social media scheduling tools that allow automatic publishing to Instagram, TikTok, and YouTube Shorts.

Instead of generating videos one by one, you can batch-generate an entire month of content from a single data source.

```
[ Google Sheet Matrix ] ➡ [ Make.com ] ➡ [ Runway / Luma AI API ] ➡
```

1. **The Trigger:** Create a **Google Sheet** inside your Google One storage. Paste the 30-day hook and prompt matrix into columns.
2. **The Connection:** Connect Make.com to your Google Sheet.
3. **The Generation:** Set Make.com to read a row daily, send the AI Prompt via API to **Runway Gen-3** or **Luma Dream Machine**, and automatically generate the video clip.
4. **The Storage:** Make.com automatically downloads the finished video file and saves it in your Google Drive `02_Raw_AI_Videos` folder.
5. **The Scheduling:** Link your Google Drive folder directly to **Metricool** or **Buffer**. You can batch-approve the clips, paste the hooks, and schedule them to auto-publish at your peak hours.

Workflow 2: The Instant Lead Capture (ManyChat)

This turns viral views into automated, immediate digital product traffic without you lifting a finger.

```
[ User Comments "MAGNETIC" ] ➡ [ ManyChat Trigger ] ➡ [ Auto-Reply to
```

1. **The Set Up:** Connect your Instagram Professional or TikTok Business account

your Gumroad checkout page.

Workflow 3: The Fulfillment & Upsell Funnel (Gumroad)

Once a user clicks the link in their DMs, your checkout and backend email marketing handle the conversion and passive upselling.

```
[ User Purchases Blueprint ] ➡️ [ Gumroad Auto-Delivers E-Book ] ➡️ [ 2
```

1. **The Sale:** The customer purchases *The Magnetism Blueprint* for $9.99 on Gumroad.
2. **Instant Fulfillment:** Gumroad securely delivers the PDF copy directly to their email inbox instantly.
3. **The Order Bump:** During checkout, activate an "Order Bump" feature. A tiny checkbox appears asking if they want to add *The Texting Framework* (the 50 scripts) for an extra $10. This automatically raises your average order value.
4. **The Post-Purchase Drip:** Gumroad automatically enrolls their email address into your **Automated Email Workflow**. It sends Email 2 after 24 hours (free high-value attraction advice) and Email 3 after 48 hours (promoting the $97 Masterclass) completely on autopilot.

⏱️ Your Total Weekly Commitment: 1 Hour

Once this infrastructure is built, your only manual task is **monitoring**.

Let’s build the exact **ManyChat automation flow** first [skills:load(local)]. This is the most critical piece of the puzzle because it instantly turns your views into automated cash flow.

Follow these step-by-step instructions to build this in less than 10 minutes.

🛠️ Step 1: Create the Trigger (The Comment)

This tells ManyChat exactly when to start the automation.

1. Log into your **ManyChat** dashboard.
2. Click **Automation** on the left menu, then click **New Flow** (top right) [skills:load(local)].
3. Select **Start from Scratch**.
4. Click **Add Trigger** and select **Instagram** (or TikTok) > **User Comments on your Post or Reel**.
5. Set the parameters exactly like this:
    1. **Which posts?** Choose **Any Post or Reel** (so this works sitewide on everything you upload).

social media algorithm into thinking your post has a highly active, conversational comment section, pushing it to the algorithmic feed.

1. In the same trigger window, look for **Public Response in Comments**.
2. Click **Add Variant** to add multiple responses. Paste these exact variations so your account looks human:
    1. *Variant 1:* "Just slid into your DMs! Check your hidden requests folder. 🖤"
    2. *Variant 2:* "Sent! Let me know what you think of Chapter 2. ✨"
    3. *Variant 3:* "Check your messages, I just sent the private link over. 🪐"
3. Set the response toggle to **Randomly rotate variants**.

🕹️ Step 3: Build the Private DM & Button Link

Now, we build the automated direct message that delivers the link.

1. Drag a line from your trigger box to create a new step. Select **Instagram** > **Send Message**.
2. In the text box, paste this high-conversion script:

> "Hey there! Thanks for checking out the page. 🖤Here is your private access link to **The Magnetism Blueprint**. Inside, you'll unlock the full breakdown of human attraction psychology and the unspoken laws of chemistry we post about.Click below to grab your copy while the launch discount is active 👇"

🚀 Step 4: Go Live

1. Look at the top right corner of your screen and click **Publish**.
2. Make sure the blue toggle next to your trigger is switched to **Active**.

Your automated sales assistant is now live 24/7. Whenever anyone comments any of your keywords, they will get an instant public reply and a private DM leading directly to your checkout page.

Now that your DM automation is ready to capture leads, would you like to set up the **Google Sheet template** to automatically feed your video clips into your scheduler, or would you prefer to review how to format the **Gumroad checkout page** next?

4. Choose the sheet name (e.g., `Sheet1`).
5. Set **Limit** to `1` (this ensures it processes exactly one video per run).
6. Under **Filter** (click the wrench icon between modules later), set it to only continue if:
    1. `Status` (Column B) **Equal to** `To Generate`.

🤖 Step 2: Connect the AI Video Generator (Runway / Luma API)

This step passes your prompt from the spreadsheet into the AI engine to generate the footage.

1. Add a new module by clicking the right side of your Google Sheets module. Search for **HTTP** and select **Make a request**.
2. Set the parameters according to your chosen video generator API (Runway or Luma):
    1. **Method:** `POST`
    2. **URL:** Enter the generation endpoint URL provided by your AI platform's developer dashboard.
    3. **Headers:** Add `Authorization` and paste your secret API key from your Runway or Luma developer settings. Add `Content-Type: application/json`.

```
    duration : 5
}
```

Use code with caution.

3. Click **OK**.

⏳ Step 3: Add a Delay and Fetch the Video

AI videos take a minute or two to render. We need to wait for the generation to complete, then download the file.

1. Add the **Tools** module and choose **Sleep**. Set it to `120` seconds (2 minutes) to give the AI engine time to render the file.
2. Add another **HTTP (Make a request)** module. Set the Method to `GET` and target the specific task/generation ID returned from Step 2 to pull the finished video file url.
3. Add one final **HTTP (Get a file)** module using the final video URL to download the actual raw video data into Make's temporary memory.

💾 Step 4: Save the Video back to Google Drive

Now we take the freshly generated file and drop it right back into your organised storage ecosystem.

1. Add a final module and search for **Google Drive**. Select **Upload a File**

🔄 Step 5: Update the Sheet Status

To prevent the system from generating the same video twice, we tell the Google Sheet that the job is successfully done.

1. Add one last **Google Sheets** module and select **Update a Row**.
2. Select the same spreadsheet and sheet name.
3. Set **Row number** to the dynamic ID from your very first step (`{{2.row_number}}`).
4. Find the **Status** column and change it to **"Ready"** (or **"Scheduled"** if your scheduler auto-pulls it).
5. Turn the scenario switch to **ON** and set the schedule to run once every day at your preferred generation time.

Your automated generation pipeline is officially mapped out! Should we now move on to configuring the **Gumroad checkout page** for your e-book fulfillment, or would you like to review how to write the **text-overlay captions** for editing?
